

Craft-Lock® Sheeting

**CLOTAN
STEEL** (Pty) Ltd

Product announcement

With millions of square meters installed over the last 2 decades, Craft-Lock concealed fix roof sheeting remains a staple for industrial, commercial, and agricultural roofing installations requiring high wind resistance and superior water tightness. Clotan Steel has been the sole manufacturer and supplier over the last 2 decades, but recently a decision was made to separate the South African operations from the operations on the rest of the African continent. Henceforth, all manufacturing, marketing, sales, supply, and technical assistance for Craft-Lock® Concealed Fixed Roofing and Cladding sheets, are conducted by the following two companies ONLY:

Projects located in South Africa:

Clotan Steel (Pty) Ltd.

Projects located outside South Africa:

KIBO Afrique (Pty) Ltd.

These two companies own and manage all the required machinery and equipment to manufacture the product on-site at any required location. Any inquiries concerning Craft-Lock should be directed to one of the above companies, depending on where a project is based.

For KIBO Afrique – J. Smith (Director)

For Clotan Steel – H. Badenhorst (Director)
